Reference letter for learning English under the guidance of Magdalena Pulchny

I have been learning English as an individual for about 10 years, but for the first time in my life in such an innovative, interesting and professional way.

Magdalena has skills of speech and writing at the level of a native speaker, so completely fluent with a great accent. This is a very important feature because the wide range of words known by Madeleine allow me to support my statements and create more advanced forms.

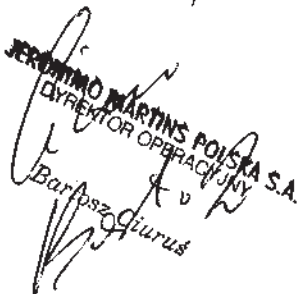

The second important value is conducting classes (lessons) in a very innovative form with the use of many tools. Each lesson takes a different form through the use of movies, music, English games, reading, writing, using the board. Each practical part is prepared in a way that builds interest and curiosity. This form helps in learning and makes lessons become productive and interesting.

The third important issue is the use of modern applications like Quizlet, YouTube, English conversation, 6 minute English, and other links to listen and learn. This causes that in addition to the lessons I can learn English in a mobile and interesting form. In addition, Ms. Magdalena keep high motivation, commitment and not only teaches but also requires a lot, which helps in development and progress.

Thanks to Magdalena, I learned to live with English, which is a great value and a key change in my thinking. All these methods allowed me to make progress that was impossible so far.

Thank You.
